Introducing the new
DESCO
DOUBLE-DUTY
MAGIC MAILER

An Amazing Time Saver for Every Office!

High-Speed Automatic Envelope Sealing COMBINED With Quick Letter Opening! Both in 1 Handy, Compact Unit

There's nothing that can do so many chores in your office—at a big saving in valuable time—and take up so little space—as **DESCO'S** new Double-Duty Magic Mailer. Here's how it works:

OUTGOING MAIL: Just whip the envelopes through and they come out sealed, ready for stamp (which is moistened on attached stamp-wetter. Wonderful for 1 envelope or 1,000.

INCOMING MAIL: Just pull any envelope through the opener and it's automatically slit open. No mess, no cuttings on floor, no "confetti." Perfectly safe; impossible to cut yourself.

**Unconditional
One-Year Guarantee!**

**A Handsome Desk
Accessory, Lustrous
Chrome-Plated.**

Guarantee

This Magic Mailer is guaranteed against rust or mechanical defect for one year from date of purchase.

To obtain a new moistening unit, loosen the moistener unit screws (illustration below) and send unit with \$1.00 to the manufacturer. If old unit is not returned, moistening unit is \$1.50.

INSTRUCTIONS

To pour water into MAGIC MAILER, simply hold the base with one hand, and with the other grip the spring carriage on both sides of the words "MAGIC MAILER." Then lift upward, removing the entire lid; a slight tug may be necessary if the lid of the new MAILER fits too tightly. Fill base about two-thirds full and replace lid. In about 10 minutes, the capillary action of the felt will wet the moistener, and the MAGIC MAILER is ready to use. (This 10-minute wait is necessary only the first time; as long as there is water in the base, MAGIC MAILER is always ready for instant use.)

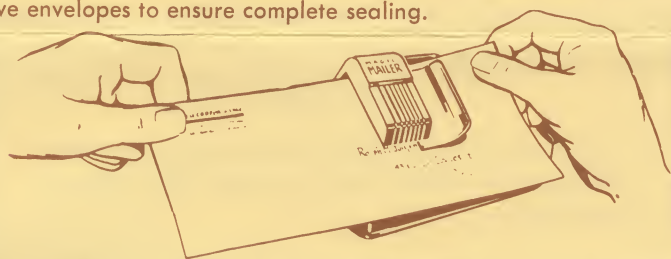

(Instructions continued on other side)

MAGIC MAILER is easy to use

1. Easy motion inserts envelope flap under moistener. For best results, hold envelope at upper-right and lower-left corners as illustrated. Note that gummed flap of envelope goes *under* the moistener unit.

However, dependent upon the amount of glue on the envelope flap it may be necessary to apply hand pressure on each stack of ten or twelve envelopes to ensure complete sealing.

2. Use right hand as a guide; **DO NOT ATTEMPT TO PUSH ENVELOPE.** Pulling motion of left hand brings envelope completely through . . . *it's moistened, sealed, and ready for a stamp.*

3. Wet stamp on the exposed stamp-moistener. (This is also handy as a finger-moistener for counting, etc.)

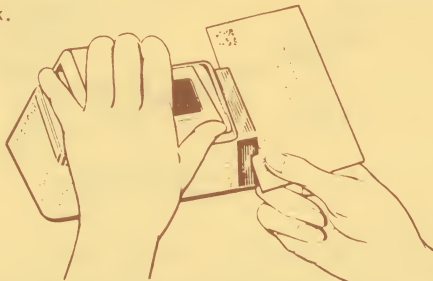

With just a little practice, you'll find you can moisten and seal any number of envelopes quickly and easily, with a smooth, continuous motion. Your fingers stay clean and dry with Magic Mailer; no mess or bother with sponges.

Easy To Clean

To remove glue which accumulates on the felt moistening wick after a period of time, simply lift the entire lid and hold under a faucet (preferably hot water), kneading the felt lightly. This will dissolve the envelope glue. DO NOT USE SOAP to wash the felt, as this will destroy the capillary action of the wick.

**TO
OPEN
YOUR
MAIL...**

. . . just slide each envelope toward you, through the slot of the opener. You can work more quickly if you hold each envelope near the left edge; this guides it accurately into the slot and prevents crinkling. (Before you start, it's a good idea to tap the whole stack of envelopes on the desk so contents are jogged away from the envelope edge that will be cut.) If it becomes necessary to replace the blade after long use, remove the opener attachment screw, lift out the lid, and replace blade with a regular injector razor blade, available at any drug store.

T. Nelson
Box 1546
Poughkeepsie, N. Y. 12603

Dear Mr. Nelson;

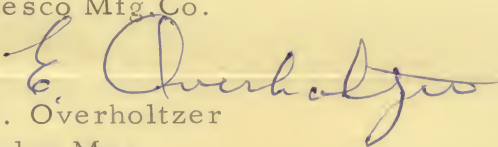

In response to your recent request to the "Office" magazine for information on our Magic Mailer, letter opener and sealer, we are pleased to inclose a number of pieces of descriptive literature.

The Magic Mailer is a quality product, is fully guaranteed and will give years of excellent and useful operation.

Many stationery firms stock the mailer however if the firm with whom you normally do business does not have them in stock they surely would be happy to order for you or if it would be more convenient you may place your order directly with us and all orders are shipped by prepaid parcel post the same day as received.

Sincerely,

Desco Mfg. Co.
